Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	2-10	YES
	Claims	1	NO
Inventive step (IS)	Claims	-	YES
	Claims	1-10	NO
Industrial applicability (IA)	Claims	1-10	YES
	Claims	-	NO
2. Citations and explanations (Rule 70.7)			
1 This opinion makes reference to the following documents:			
D1: US 4 993 948 A (CAMERON FREDERICK J ET AL) 19 February 1991 (1991-02-19)			
D2: US-A-4 338 925 (MILLER JO) 13 July 1982 (1982-07-13)			
D3: WO 01/52924 A (ULTRADENT PRODUCTS INC) 26 July 2001 (2001-07-26)			
2 INDEPENDENT CLAIM 1			
2.1 The present application does not meet the requirements of PCT Article 33(1), because the subject matter of claim 1 is not novel within the meaning of PCT Article 33(2).			
Document D1 discloses (see column 2, lines 8-48): An injection device (for tooth-filling material), comprising A) a syringe body (6) with a connecting piece (front end of plug 17 with receiving bore 20) which is arranged at the front end and has a coaxial bore

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
-----------	---

	<p>(20), and with a coaxial cavity;</p> <p>B) an injection plunger (11, 13) displaceable in the cavity; and</p> <p>C) a cannula (21) which can be joined to the connecting piece (front end of plug 17), wherein</p> <p>D) the syringe body (6) has, at its front end, a transition segment (rear end of plug 17) with a coaxial bore, and wherein</p> <p>E) the bore in the transition segment and the lumen of the cannula (21), at the rear end of the cannula, have the same cross section (see figure 2).</p>
--	--

Figure 2 in D1 is interpreted in the sense that the transition segment is the part of plug 17 that reaches from the syringe barrel as far as the receiving bore (20); the connecting piece accordingly includes the area around the receiving bore (20).

Consequently, the subject matter of claim 1 is already known from D1.

3 DEPENDENT CLAIMS 2-10

Claims 2-10 do not contain any features which, in combination with the features of any claim to which they refer, meet the PCT requirements for novelty and inventive step:

Claim 2: Document D2 discloses an injection device for bone cement in which, depending on the application, a cannula with constant cross section (figure 3) is used.

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

Claims 3, 4: The cross-sectional ratios specified in claims 3 and 4 obviously lie within the customary ranges.

Claims 5-10: Document D3 discloses a syringe (64) for mixing and administration (page 1, lines 9-20) of a highly viscous compound (page 3, lines 10-14), the front end of the syringe having a Luer lock attachment without internal cone (page 7, lines 14-16, figures 4, 5).
